Moratorium on Data Centers and Data Center Accessory Development

for the Town of Paris

WHEREAS, there has been a recent increase in the development of large-scale data centers within the State of Maine; and

WHEREAS, data centers consume disproportionate amounts of water and electrical energy, often equivalent to tens of thousands of homes; and

WHEREAS, data centers are known to strain local energy grids and result in an increase in residential utility costs; and

WHEREAS, data centers can create noise pollution, heat islands, and have significant environmental impacts, requiring large amounts of water to function; and

WHEREAS, the development of data centers within the Town, without appropriate ordinance and regulatory standards, is likely to result in an overburdening of Town resources and facilities; and

WHEREAS, the Town of Paris Ordinances and other available Town Codes and regulations are inadequate to prevent serious public harm that may result from the development of data centers in the Town or provide for the effective review and regulation of energy consumption, water usage, noise levels, visual impact, setbacks from residential areas, and impacts on public utilities and infrastructure; and

WHEREAS, the Town requires at least 180 days to gather information regarding the potential effect of data centers on the local energy grid and environment and to develop and implement ordinances and regulations necessary to address these

development pressures and protect the public health and safety, natural resources, and welfare of the Town's residents; and

WHEREAS, the Town finds that the foregoing facts necessitate the imposition of a temporary moratorium on data centers and data center accessory units;

NOW THEREFORE, pursuant to the authority granted to it by 30-A M.R.S. §4356, be it hereby ordained by the legislative body of the Town of Paris, Maine, as follows:

1) This Data Center and Data Center Accessory Moratorium Ordinance ("Moratorium Ordinance") is hereby
enacted pursuant to the authority granted to Town of Paris, under 30-A M.R.S. § 3001 and 30- A M.R.S. § 4356 and, in furtherance thereof, the Town Select Board hereby declares a moratorium on the siting, permitting, construction and operation of data centers and data center accessory units within the Town of Paris.

2) This Moratorium Ordinance shall take effect immediately upon its adoption by the Town and, notwithstanding 1 M.R.S. §302, shall have retroactive application to October 13, 2026. This moratorium shall remain in effect for one hundred and eighty (180) days from its effective date, unless extended by order of the Town Select Board or repealed or modified by ordinance, for the express purpose of drafting an amendment to the Town of Paris Ordinance and other Town codes and regulations to establish appropriate standards for the siting, permitting, construction and operation of data centers and data center accessory units within the Town of Paris.

3) During the effective period of this Moratorium Ordinance, no official, officer, board or agency of the Town of Paris shall accept, process, approve, deny or in any other way act upon any application or request for any type of permit or approval relating to the siting, permitting, construction or operation of a new, enlarged or expanded data center or data center accessory units within the Town of Paris.

4) For the purposes of this Moratorium Ordinance, the term "data center" shall mean a building or group of buildings primarily occupied by computers, servers, and/or telecommunications-related equipment where digital information is processed, transferred, and/or stored, primarily to and from offsite locations. This definition includes, but is not limited to, facilities used for artificial intelligence computing, cryptocurrency mining, blockchain transaction processing, and server farms. This definition does not include computers or telecommunications equipment that are secondary and customarily incidental to an otherwise permitted use on the property, such as servers associated with an office building, agricultural operation, or retail establishment.
"Data Center Accessory" shall mean any use or structure that is secondary and incidental to a Data Center, including but not limited to: electrical substations; generators; cooling towers; water storage, treatment, or pumping facilities; wastewater treatment facilities; battery energy storage systems; on site power generation facilities; security structures; and administrative buildings associated with data center operations.

5) If any data center and/or and data center accessory is opened or operated within the Town in violation of this
Moratorium Ordinance, such operation shall constitute a violation of this Moratorium Ordinance, and each day of such violation shall constitute a separate violation of this Moratorium Ordinance. The Town's officers, officials and employees are hereby authorized to institute any, and all rights available to it pursuant to 30-A M.R.S. § 4452, including fines and penalties, injunctive relief, and its reasonable attorneys' fees and costs in prosecuting any such violation.

6) Any of the Town's ordinances that are inconsistent or in conflict with the provisions of this Moratorium Ordinance are hereby repealed to the extent applicable for the duration of the moratorium imposed by this Moratorium Ordinance. If any section or provision of this Moratorium Ordinance is declared by a court of competent jurisdiction to be invalid, such a declaration shall not invalidate any other section or provision.

Attest: A true copy of an ordinance entitled "Moratorium on Data Centers" as certified to me by the municipal officers of Paris on the 13th day of October 2026

Signature, Town Clerk of Paris _____
